

What is VirtualBox?

- VirtualBox is a free and open-source virtualization software that allows you to run multiple operating systems (OS) on a single computer.
- It creates a virtual environment (Virtual Machine) inside your main OS, so you can install and use another OS without affecting your actual computer.

What is Kali Linux?

- Kali Linux is a Debian-based Linux distribution specially designed for cybersecurity, penetration testing, and ethical hacking.
- It comes with hundreds of pre-installed tools for network security, forensics, and vulnerability testing.
